MARRIVADA KOTA SATYANARAYANA

SQL Developer | Data Engineer | Python Developer

+91 6303495644 | satyamarrivada562@gmail.com | linkedin.com/in/satyamarrivada1292ab370 | github.com/Satya-982

PROFESSIONAL SUMMARY

Detail-oriented Computer Science graduate (M.Tech AIML, 2025–27) with practical experience in Python, SQL, ETL pipelines, and data structures. Proven ability to write optimized queries, build end-to-end data workflows, debug complex logic, and communicate insights to cross-functional teams. Experienced in transforming raw datasets into reliable, structured information through internship and project work.

TECHNICAL SKILLS

Languages & Querying: Python (NumPy, Pandas, Matplotlib), SQL, Oracle 10G, HTML, CSS, Flask
Data Engineering: Data Pipelines, ETL Processes, Data Cleaning & Validation, Data Structures, Database Normalization
Databases & Reporting: MySQL, Oracle 10G, Power BI, MS Excel — joins, indexing, stored procedures, query optimization
Core Competencies: Debugging, Problem Solving, Analytical Thinking, Communication Skills, Remote Collaboration

PROFESSIONAL EXPERIENCE

Python Full Stack Intern — JSpyders, Hyderabad 2023 – 2024

- Designed and executed SQL queries for data extraction, reporting, and backend API support — improving data retrieval speed by applying indexing techniques.
- Built and maintained ETL data pipelines using Python (Pandas) to extract raw data, clean inconsistencies, and load structured records into relational databases.
- Worked with complex data structures (lists, dictionaries, DataFrames) to transform and aggregate large datasets for analytical reporting.
- Debugged production-level SQL and Python issues, identifying root causes in data pipeline failures and query logic errors.
- Collaborated with developers and analysts to define data requirements, document workflows, and communicate findings — demonstrating strong problem-solving and communication skills.

KEY PROJECTS

MRP Outlet System — Retail Database Application

- Designed a normalized relational schema (3NF) and built SQL stored procedures to automate retail reporting pipelines.
- Implemented multi-table joins and aggregations to generate sales and inventory dashboards, reducing manual reporting effort.

AI Aqua Assistant — Data Pipeline & Analytics

- Developed an ETL pipeline using Python to ingest, validate, and load sensor data into a structured SQL database.
- Built Power BI dashboards connected to the live database, enabling real-time monitoring and trend analysis for farmers.

Real Estate Price Prediction — ML & Data Analysis

- Cleaned and structured housing datasets using SQL and Pandas data structures; debugged data quality issues to ensure model accuracy.

EDUCATION

M.Tech – Artificial Intelligence & Machine Learning 2025 – 2027
Vishnu Institute of Technology

B.Tech – Computer Science & Engineering 2020 – 2024
NRI Institute of Technology **GPA: 7.67 / 10**

ADDITIONAL INFORMATION

Languages: English (Fluent) | Telugu (Fluent) | Hindi (Basic) **Availability:** Immediate | Remote-ready
